### Printer

Katun PN: 36981  
OEM PNs: TK 120 (EU/FE)  
TK 122 (NA/LA)

## Katun introduces yet another new high-quality toner for use in Kyocera Mita printers

Dealers, distributors and office supply wholesalers who have come to rely on Katun for high-quality new-build toner cartridges for their Kyocera Mita printers, can now order Katun® Performance™ new-build toner kit for use in their current base of mid-volume Kyocera Mita FS 1030 D printers. These products provide the ideal combination of cost-savings and high-quality performance, and offer greater reliability than some other aftermarket remanufactured and new-build toner cartridges.

### Benefits:

#### ◆ Expense Reduction When You Need it Most!

In today's uncertain economic environment, most every business, whether large or small, is looking for cost savings and other ways to stay ahead of their competition. This new Katun® Performance™ toner offers you just that - significant savings versus OEM supplies, with no compromises on quality.

#### ◆ A Growing Line You Can Depend On

Katun's range of products for use in Kyocera Mita printers continues to expand with the introduction of this new toner cartridge. Kyocera Mita dealers who have successfully utilized previous Katun® toner cartridges because of their consistent performance, high print quality and significant cost savings, will be equally satisfied with this new Katun® toner cartridge.

#### ◆ Receive Katun® Performance™ Quality In a Wide Range of Usage Conditions

Katun takes extra steps to validate performance in high and low temperature / humidity environments, and utilizes high page coverage prints during testing. Now you can be confident that these Katun® Performance™ toners will provide consistent performance in a wide range of usage conditions.

#### ◆ Full Compatibility

Cost savings can be achieved many ways, but choosing reliable, quality aftermarket toner cartridges from Katun ensures true cost savings. Not all aftermarket products can produce true cost savings, as some can add costs because of poor quality performance, low yields, and unexpected service calls. Generating true cost savings by choosing Katun® toner cartridges is one way to save money and increase profits without sacrificing quality.

## Product Characteristics
